For the factory visit, the group divided itself into four smaller groups. Each group had a guide and a faculty with it. The guide started the tour right from the bamboo storage yard and explained how bamboo and woods are fed into the chipper machine which cuts them into pieces. The group moved along the conveyer belt so as to see the whole process of conversion of woods into paper. Guide took the group to various machines explaining the function of each one carefully. In the paper section of the unit, the students got to see the final process of paper formation, drying, and cutting into pieces. The group thanked all the workers for their explanation.

It was an important lesson from this visit for the students. The students thanked their guide for his talk and bid goodbye to all the staff of JK Paper.
