Women's Day Celebration

8th March 2024

"Invest in Women: Accelerate Progress"

Women's day is celebrated to appreciate the achievements of females who have fought for equality. It also gives a platform to accelerate awareness on women's rights across different

sectors including social, economic, cultural and political achievements.

"It is rightly said that women are the real architect of society" and to recognise that how important they are as a

part of UTU, the BV Patel Institute felicitates the female workers of the institute.

The students also participated in Poster Making Competition which reflected the independence, empowerment, courage, strength, etc of women in different fields.
